## A Theory of Fun for Game design *by* Raph Koster

The 10th anniversary edition of this classic book takes you deep into the influences that underlie modern video games, and examines the elements they share with traditional games such as checkers. Veteran game designer Raph Koster takes a close look at the concept of fun and why it's the most vital element in any game. Why do some games become boring quickly, while others remain fun for years? How do games serve as fundamental and powerful learning tools?

**Lyme: the first epidemic of climate change** by Mary Beth Pfeiffer

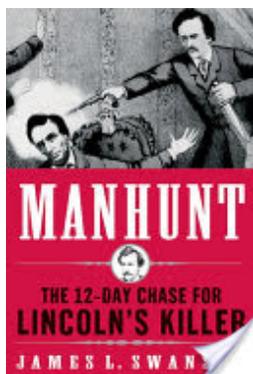

Lyme disease is spreading rapidly around the globe as ticks move into places they could not survive before. The first epidemic to emerge in the age of climate change, Lyme infects half a million people in the US and Europe each year, and untold multitudes in Canada, China, Russia, and Australia. She tells the stories of families devastated by a single tick bite, of children denied care, and of one women's wrenching choice after a fruitless search for a cure.

**Manhunt: the twelve-day chase for Lincoln's killer**  
by James L. Swanson.

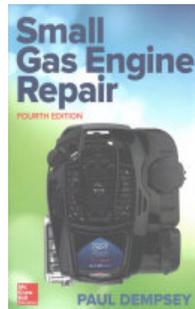

“A Confederate sympathizer and a member of a celebrated acting family, John Wilkes Booth threw away his fame and wealth for a chance to avenge the South's defeat. Based on rare archival materials, obscure trial transcripts, and Lincoln's own blood relics, this book is a fully documented work, but it is also a tale of murder, intrigue, and betrayal, an hour-by-hour account told through the eyes of the hunted and the hunters.
